**MOUSE AND RAT CONTROL. 8 OZ**

- RatX is a new patented EPA FIFRA 25 (b) rodenticide
- Formulated entirely from non-toxic materials, RatX is first product of its kind
- It is not a poison, it is a 100% all natural product that presents no harm to any other living thing except a rat or a mouse
- There is no Secondary Kill risk with birds or other animals and is even safe for pets or small children who may ingest the product by mistake

**EXCELLENT VALUE**

- RatX is a new approach to effectively kill unwanted rats and mice from industrial buildings, livestock premises, homes, barnyards and any other area where unwanted pests inhabit
- The testing on our product was done at Purdue University and some of the testing sites were chicken farms, turkey farms, egg farms, etc.
- We have received remarkable results in all of our testing aspect
- Ratx works by coating the inner lining of a part of the rat/mouses lower gut
- This coating of the fine hairs in the lower gut, called villi, disrupts the message system to the rodents brain causing it to stop drinking water
- This leads to very quick dehydration, blood thickening, kidney failure, coma and eventually death
- Another great aspect of RatX is in our accelerated dehydration to control odors

- RatX is a new patented EPA FIFRA 25 (b) rodenticide
- Formulated entirely from non-toxic materials, RatX is first product of its kind
- It is not a poison, it is a 100% all natural product that presents no harm to any other living thing except a rat or a mouse
- There is no Secondary Kill risk with birds or other animals and is even safe for pets or small children who may ingest the product by mistake
- RatX is a new approach to effectively kill unwanted rats and mice from industrial buildings, livestock premises, homes, barnyards and any other area where unwanted pests inhabit
- The testing on our product was done at Purdue University and some of the testing sites were chicken farms, turkey farms, egg farms, etc.
- We have received remarkable results in all of our testing aspect
- Ratx works by coating the inner lining of a part of the rat/mouses lower gut
- This coating of the fine hairs in the lower gut, called villi, disrupts the message system to the rodents brain causing it to stop drinking water
- This leads to very quick dehydration, blood thickening, kidney failure, coma and eventually death
- Another great aspect of RatX is in our accelerated dehydration to control odors

CYKILL SEED BAIT RAT AND MOUSE POISON. 4 LB.

- Palatable bait ideal for residential or agricultural rodent control
- Rodents usually consume a lethal dose in a single night's feeding, and stop feeding after consuming a toxic dose so less bait is consumed
- Effective against anticoagulant-resistant mice and rats, Norway rats, roof rats, house mice, and meadow voles
- No known resistance, reduced secondary toxicity
- Food-grade ingredients provide an excellent base to compete where other food or feed sources are present
- Use indoors, in burrows, within 100-feet of man-made structures, or inside of transport vehicles such as ships, trains, or aircraft
